

SEDGWICK PARISH COUNCIL CANAL REPORT

Canal Safety Inspection January 2026

It is very damp and wintry but all is good..... only the very bravest daffodil bulbs are daring to poke their heads above ground. The canal basin has standing water but is not as full as last year.

Trees: Part of an old dead skeleton tree on the far side of the embankment opposite the Stoker Seat has failed and has landed down slope and into the canal basin where it isn't doing anyone any harm.

Vegetation: The vegetation has died right back

Benches: All OK

Paths: Lots of leaf mould turning to mud which is normal for the time of year.

Boundaries, Walls and Fences – Brilliant news – The stone wall has been repaired – I am guessing by Mr Simpson – huge thanks to him. I will send a thank you letter.

Signage: All looks ok.

Usage: Extremely busy. Some dog poo and tyre marks from cycles.
