

## SEDGWICK PARISH COUNCIL CANAL REPORT

### Canal Safety Inspection July 2025

Insects and birds are thriving – especially the Chiff Chaffs!

**Trees:** Just as the ashes are doing well, the Horse Chestnut at the start of the gentle path is in crisis- it looks like leaf miner which we cannot do anything about but it will weaken the tree eventually. It won't be a good year for conkers.....

**Vegetation:** The June cut is now needed – especially at the Hill Bridge

End and the easy path approach needs the tree cutting back.

**Benches:** All OK

**Paths:** Despite the wet summer, the path is dry.

**Signage:** All looks ok.

**Boundaries, Walls and Fences** – all look good.

**Usage:** Extremely busy – dog poo on aqueduct

I am still waiting for a date from JP Contractor and an appointment from Treescapes

**CRT:** Aqueduct dog poo and there is fly tipping of garden waste in the aqueduct basin and the path is very overgrown.
